Tectonophysics Volume 222

Research Papers

The Ivory Coast–Ghana transform margin: a marginal ridge structure deduced from seismic data
C. Basile, J. Mascle, M. Popoff, J.P. Bouillin and G. Mascle 1

Seismic anisotropy inferred from wide-angle reflections off Lofoten, Norway, indicative of shear-aligned minerals in the upper mantle
R. Mjelde and M.A. Sellevoll 21

Variscan crustal thickening, extension and late overstacking during the Namurian–Westphalian in the western Montagne Noire (France)
D. Cassard, J.-L. Feybesse and J.-L. Lescuyer 33

Holocene tectonic uplift deduced from elevated shorelines, eastern Coastal Range of Taiwan
P.M. Liew, P.A. Pirazzoli, M.L. Hsieh, M. Arnold, J.P. Barusseau, M. Fontugne and P. Giresse 55

Lake patterns as related to neotectonics in subsiding basins: the example of the Ucamara Depression, Peru
J.F. Dumont 69

Source parameters of earthquakes along the coastal margin of West Africa and comparisons with earthquakes in other coastal margin settings
A.S. Suleiman, D.I. Doser and D.R. Yarwood 79

Macro-anomaly and its application to earthquake prediction
T. Rikitake, N. Oshiman and M. Hayashi 93

Implications of discrete strain compatibility in multilayer folding
J.V. Smith and B. Marshall 107

Basement heat flow in the Western Canada Sedimentary Basin
S. Bachu 119

Pre-lithification structures, deformation mechanisms, and fabric ellipsoids in slumped turbidites from the Pigeon Point Formation, California
S.R. Paterson and O.T. Tobisch 135

Syntectonic development of a strain-independent steady-state grain size during mylonitization
K. Michibayashi 151

Rapid apparent polar wandering of South China during the latest Paleozoic and early Mesozoic: a paleomagnetic study of Upper Permian limestones from Guizhou province
Z. Wang and R. Van der Voo 165

$^{40}Ar/^{39}Ar$ mineral age constraints for the tectonothermal evolution of a Variscan suture in southwest Iberia
R.D. Dallmeyer, P.E. Fonseca, C. Quesada and A. Ribeiro 177

Petrofabric, P-wave anisotropy and seismic reflectivity of high-grade tectonites
S. Ji, M.H. Salisbury and S. Hanmer 195

Infinitesimal kinematics of rotational rifting with reference to en echelon marginal faults in the Red Sea region
J.V. Smith 227

Segmentation, volcanism and deformation of oblique spreading centres: a quantitative study of the Reykjanes Ridge
B.J. Murton and L.M. Parson 237

Seismotectonics of western Anatolia: regional stress orientation from geophysical and geological data
A. Zanchi and J. Angelier 259

Special Issue: Geological Perspectives on Global Change (edited by D.M. Anderson and G.P. Eaton)

Preface 275

Climate change on tectonic time scales
T.J. Crowley 277

Evidence of astronomical forcing of the Earth's climate in Cretaceous and Cambrian times
G.C. Bond, W.J. Devlin, M.A. Kominz, J. Beavan and J. McManus 295

Stable isotopic composition of meteoric calcites: evidence for Early Mississippian climate change in the Mission Canyon Formation, Montana
T.M. Smith and S.L. Dorobek 317
Paleoglobal change during deposition of cyclothems: calculating the contributions of tectonic subsidence, glacial eustasy and long-term climate influences on Pennsylvanian sea-level change
G.D. Klein 333
Time calibration of Triassic/Jurassic microfloral turnover, eastern North America
S.J. Fowell and P.E. Olsen 361
Eustatic cyclicity in the Paleocene and Eocene: data from the Brazos River Valley, Texas
A.J. Davidoff and T.E. Yancey 371
A geologic perspective on the Miocene evolution of the Antarctic Circumpolar Current system
F.R. Rack 397
Volcano-tectonic events and sedimentation since Late Miocene times at the Mohns Ridge, near 72°N, in the Norwegian–Greenland Sea
L. Géli 417
Subsidence of the Texas coast: inferences from historical and late Pleistocene sea levels
J.G. Paine 445
